QUALITÄT IN JEDEM RAD

Brock Alloy Wheels Leichtmetallräder zeichnen sich durch eine einzigartige Optik aus. Modernste Software ermöglicht bereits in der Planungsphase die Gestaltung von mathematisch und topologisch optimaler Geometrien. So wird jedes für die Festigkeit irrelevante Gramm Material gespart, um einerseits natürliche Ressourcen wie Aluminium oder Kraftstoffe zu schonen und andererseits ein hervorragendes Fahrgefühl zu gewährleisten.

Aluminiumfelgen von Brock und RC-Design beeindrucken mit hervorragender Stabilität. Sie gewährleisten höchste Sicherheit als auch überdurchschnittliche Lebensdauern. Zertifizierte Managementsysteme in Qualität, Umwelt und Energie finden bei uns Anwendung. Diese unterstützen uns bei der kontinuierlichen Verbesserung neuer Produktgenerationen, wie der Brock B41 und RC-Design RC34.

QUALITY IN EVERY WHEEL

Alloy wheels from Brock distinguish by their superior optics. Modern software allows the design of mathematical and topologically perfect geometries already in the planning phase. So every single, for the strength irrelevant gram, is saved to protect natural resources such as aluminum or fuels on the one hand, while ensuring an outstanding driving experience on the other hand.

Aluminium wheels from Brock and RC-Design impress with excellent stability. They guarantee highest safety as well as above-average long lifetimes. Certified management systems in quality, environment and energy help us to continually improve new product generations such as the Brock B41 and RC-Design RC34.
